## PROFESSIONAL SUMMARY

Full-Stack Web Developer with hands-on experience in MERN stack development and building scalable web applications. Proficient in utilizing Generative AI and rapidly mastering new technologies. Strong problem-solving abilities with experience in integrating front-end and back-end systems, API development, and delivering user-focused solutions with optimized performance.

## CORE COMPETENCIES

**Frontend Technologies:** HTML5, CSS3, JavaScript (ES6+), React.js, Redux, Bootstrap, Tailwind CSS, Responsive Design  
**Backend Technologies:** Node.js, Express.js, RESTful APIs, MongoDB, Firebase, Database Design  
**Problem Solving & Algorithms:** Data Structures, Algorithms, Performance Optimization  
**Development Tools:** Git, GitHub, VS Code, Postman, Chrome DevTools, Render, Netlify  
**Soft Skills:** Problem Solving, Team Collaboration, Project Management, Adaptability, Communication

## EXPERIENCE

### Software Development Intern

Jan 2024 – Jun 2024

A2Z IT HUB Private Limited

- Developed responsive web applications for multiple clients using modern JavaScript frameworks, ensuring cross-browser compatibility and optimal user experience
- Built and maintained admin panel interfaces for efficient content management and user data handling, improving operational workflow by 30%
- Collaborated with cross-functional teams to integrate front-end components with back-end APIs, delivering scalable full-stack solutions
- Optimized application performance through code refactoring and implementing best practices, resulting in 25% faster load times

## EDUCATION

### Full Stack Web Development Bootcamp

Jul 2024 – Mar 2025

Masai School

Bengaluru, India

### Bachelor of Business Administration (Computer Application)

Oct 2021 – Apr 2024

New Arts Commerce and Science College

Ahilyanagar, India

## PROJECTS

### GitHub Recruiter | React, Node.js, Express.js, MongoDB, GitHub API, Firebase

2025

- Developed a full-stack technical hiring platform in 48 hours during hackathon, streamlining recruitment through real-time GitHub data analysis
- Implemented custom scoring algorithm to evaluate developer profiles based on commit frequency, language proficiency, and code quality metrics
- Built intelligent candidate recommendation system using GitHub API integration and ML-based evaluation logic for role-specific matching
- Achieved 80% reduction in manual resume screening time through automated profile analysis and ranking system
- Live Demo:** gitmatch-hackathon-frontend.onrender.com

### MediTrack | React.js, Tailwind CSS, Firebase, Real-time Database

2025

- Led development of comprehensive medication management application for tracking prescriptions, dosages, and medical history
- Architected responsive frontend using React.js and Tailwind CSS with focus on intuitive UX and mobile-first design
- Integrated Firebase for real-time data synchronization and push notifications, ensuring seamless user experience across devices
- Managed team of 4 developers, implementing agile methodologies and code review processes for quality assurance
- Live Demo:** meditrackapplication.netlify.app

## CERTIFICATIONS

### Galactic Problem Solver | NASA International Space Apps Challenge

2023
